

Shantan Yeddula

Software Engineer

7799574286 | shantanyeddula125@gmail.com | LinkedIn

Professional Summary

Software Engineer with experience in Java backend development, Platform Engineering, and CI/CD automation in enterprise cloud-native environments. Developed and maintained RESTful APIs and scheduler-based batch applications, contributed to Spring-to-Spring Boot and configuration migrations, and developed reusable GitHub Actions workflows for Jenkins modernization. Hands-on with Spring Boot, Spring Cloud Config, Liquibase, Azure Kubernetes Service (AKS), Red Hat OpenShift (OCP), Docker, Kubernetes, and Linux.

Technical Skills

Programming Languages: Java, Python, SQL

Frameworks & Backend: Spring Boot, Spring MVC, REST APIs, Spring Cloud Config, Liquibase

Cloud & Platform Engineering: Microsoft Azure, Azure Kubernetes Service (AKS), Red Hat OpenShift (OCP), IBM UrbanCode Deploy (UCD)

DevOps & CI/CD: GitHub Actions, Docker, Kubernetes, Git, Linux

Build & Code Quality: Maven, SonarQube, Nexus Repository

Databases: MySQL, PostgreSQL

Collaboration: Jira, Agile (Scrum)

Professional Experience

HCLTech

Dec 2024 - Present

Software Engineer

Platform Engineering

- Contributed to a reusable three-layer CI/CD architecture separating application repositories, deployment workflows, and centralized deployment configurations across multiple development teams.
- Developed reusable GitHub Actions workflows for the enterprise migration from Jenkins to GitHub Actions, improving pipeline standardization.
- Automated Liquibase database deployment pipelines to standardize database release processes.
- Participated in planning Linux deployment automation using IBM UrbanCode Deploy (IBM UCD).
- Collaborated with development and DevOps teams to improve deployment consistency, CI/CD standardization, and engineering productivity.
- Supported deployment workflows for applications running on Azure Kubernetes Service (AKS) and Red Hat OpenShift (OCP).

Java Backend Development

- Developed and maintained 7 enterprise RESTful API applications and contributed to 2 scheduler-based batch applications.
- Supported cloud-native applications deployed on Azure Kubernetes Service (AKS) and Red Hat OpenShift (OCP).
- Contributed to migrating legacy Spring applications to Spring Boot to improve maintainability and standardize the backend stack.
- Contributed to migrating configuration management from database-driven configuration to Spring Cloud Config.
- Implemented caching for frequently accessed static data, reducing unnecessary database calls and improving API response performance.
- Managed database schema versioning using Liquibase.
- Resolved Nexus Repository vulnerabilities and addressed SonarQube code-quality issues.
- Worked in Agile Scrum teams using Jira for sprint planning, task tracking, and feature delivery.

Internship

CoreNuts Technologies

Jun 2024 - Dec 2024

Java Developer Intern

- Developed CRUD-based backend applications using Java, Spring Boot, RESTful APIs, and MySQL following layered architecture principles.
- Built and tested backend modules using Maven and Git, gaining practical experience in API development, database integration, and clean coding practices.

Education

KSRM College of Engineering

2021-2024

Bachelor of Technology, Computer Science and Engineering

Loyola Polytechnic College

2018-2021

Diploma, Electronics and Communication Engineering
